

The Brain-Heart Failure Priority Setting Partnership

People with heart failure may experience changes to their brain, their thinking, or their mental health.

If you **have** or **support** someone with heart failure
we need your help!

Tell us here!

**What questions do you have
about the connections between
heart failure and the brain?**

www.brainhf.com

Together, we can shape the brain-heart
failure research agenda in Canada!
